Summary

Info session is an initiative organized by FHTS team to provide detailed information on various topics. The session is conducted to educate, disseminate information, and interact with young minds to inform the audience and address queries.

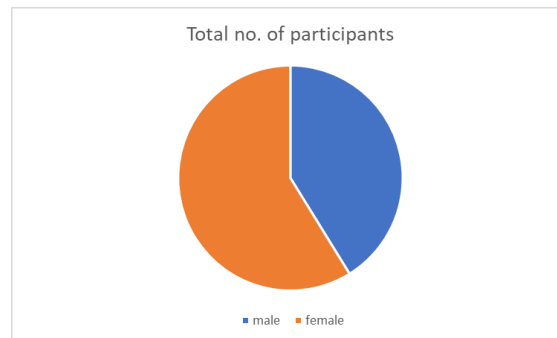

Info sessions serve as a platform to provide essential information such as what program we are offering, benefits, needs, and when the program is tentatively scheduled which aids communication and engages participants which further enhances knowledge and helps the audience to make an informed decision.

Objectives

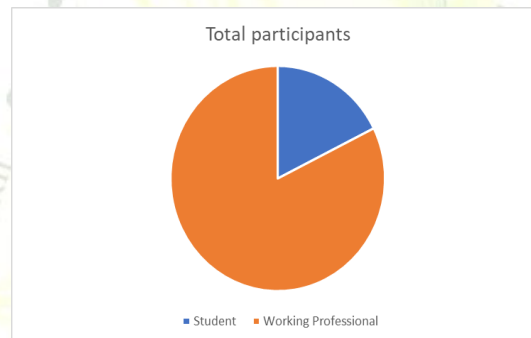

- Providing a platform for getting more knowledge about operational research and implementation science
- Creating an interactive environment for participants to raise their queries and share their insights.
- Delivering more details about a training program named Certificate Program Operational Research in Population Health jointly organized by both institutes for public health students and young professionals to escalate their skills.

Highlights:

The info session was attended by 34 participants wherein the majority of the participants were females.

Interestingly, the majority of the audience in the session were working professionals and some of them were students

Interestingly the majority of the audience in the session belonged to over 2 countries and 7 different states.

Webinar:

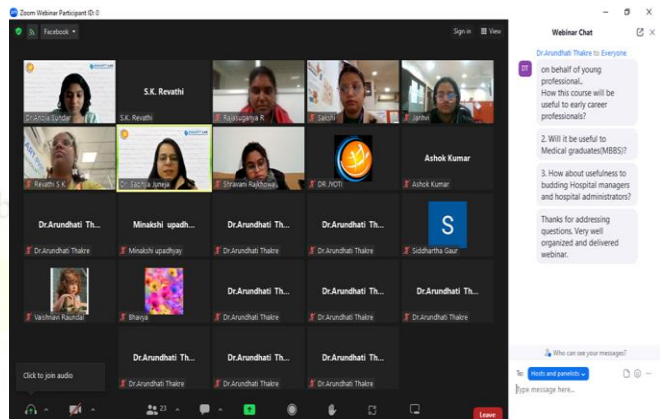

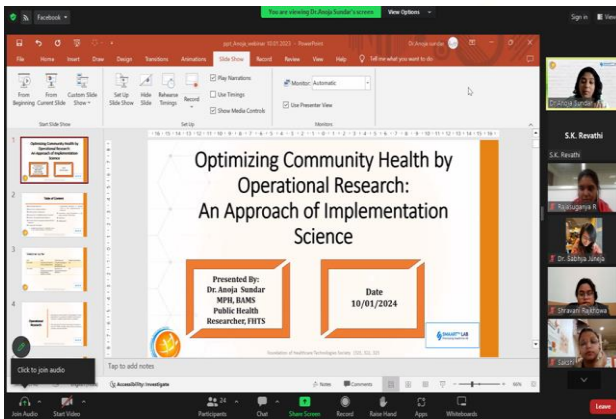

On account of the facts, FHTS in collaboration with Parul Institute of Public Health conducted a webinar to spread knowledge and awareness about operational research and implementation science. Moreover, the webinar was an opportunity for the participants to get more information on the training program named Certificate Program Operational Research in Population Health jointly organized by both institutes for public health students and young professionals to escalate their skills.

The speaker of the webinar was Ms. Ashruti Bhatt (Public Health Researcher, FHTS) she spoke about Operational research (OR) and how this discipline uses quantitative or qualitative models to aid decision-making in complex implementation problems. The event had interactive questions and answers in between. The attendees participated actively which made the event an interactive session.

Suggestions and Feedback:

- Good session
- Gained knowledge
- Wonderful session
- Learned more about Operational Research
