Date: 24/11/2023

Place: Bhikaji Cama Place, New Delhi

Time: 11:00 am to 02:00 pm

Number of total beneficiaries: 2

Number of total female beneficiaries: 0

## World Antimicrobial Resistance Awareness Week

World Antimicrobial Resistance Awareness Week (WAAW) is a global initiative that takes place annually from the 18 to 24th of November to raise awareness about the growing threat of antimicrobial resistance (AMR) and promote responsible use of antibiotics and other antimicrobial agents. The misuse and overuse of these medications have led to the emergence of drug-resistant strains of bacteria, viruses, parasites, and fungi, making infections harder to treat and posing a significant risk to public health.

The theme for this year was "Preventing antimicrobial resistance together" as it was in 2022. It's essential to adapt the themes and activities of World Antimicrobial Resistance Awareness Week based on the evolving challenges and developments in the field of AMR. Foundation of Healthcare Technologies Society's (FHTS) commemorated this day with a goal to promote awareness, encourage responsible practices, and work collectively to address this critical global health issue and were successful to organize Swasthya Pahal-Health For All Self-Management Camps at Bhikaji Cama Place, which is an urban market area surrounded by offices. The conversation at this place was to encourage individuals to take responsibility for their health, follow prescribed treatment plans, and avoid self-medication.

### Objectives

- To promote awareness, encourage responsible practices, and work collectively to address this critical global health issue.

### Details

**Date:** 24<sup>th</sup> November 2023

**Venue:** Bhikaji Cama Place, New Delhi

**Start time:** 11:00 AM

**End time:** 02:00 PM

**Objective:** To promote awareness, encourage responsible practices, and work collectively to address this critical global health issue.

Number of beneficiaries: 2

**Team Members:** Sakshi Mandawaria, Gunjan Sooden, Sushmi Wilson, Shravani Rajkhawa, Ashok Kumar

## Observations

- Following registration for Swasthya Pahal, beneficiaries were informed about how antibiotic resistance spreads and how it can be controlled.
- All the beneficiaries found the awareness session to be informative and knowledgeable.
- They next went to the Swasthya Pahal initiative for a health checkup, where they were once again satisfied with the insight into their health condition and the techniques recommended to self-manage it.
