## SUMMARY

CAMP is a unique, first of its kind, public health Career and Mentorship Program that aims to provide students an opportunity to explore career pathways in the field of public health. This program orients and equips prospective students towards building a successful public health career and its related fields. [Read More](#)

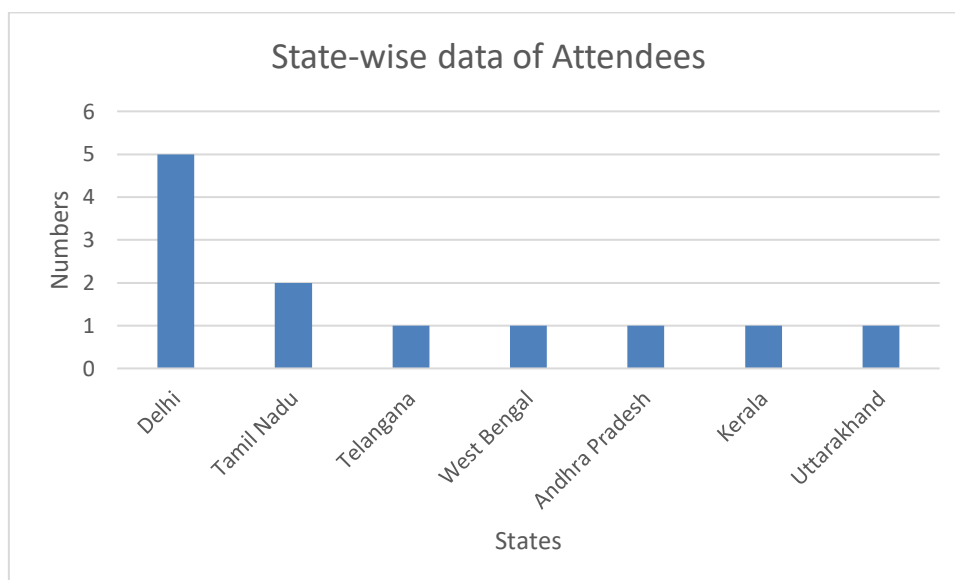

The eleventh event under CAMP initiative was conducted on 12<sup>th</sup> January 2024 on Typology of Reviews in Research: An Overview. The objective of this topic was to offer an array of literature review types such as narrative, systematic, meta-analysis, and so on where the participants will delve into the various steps required in executing each type of literature review which will explore various reporting guidelines for these review types, and understand the significance of adhering to these guidelines.

## HIGHLIGHTS

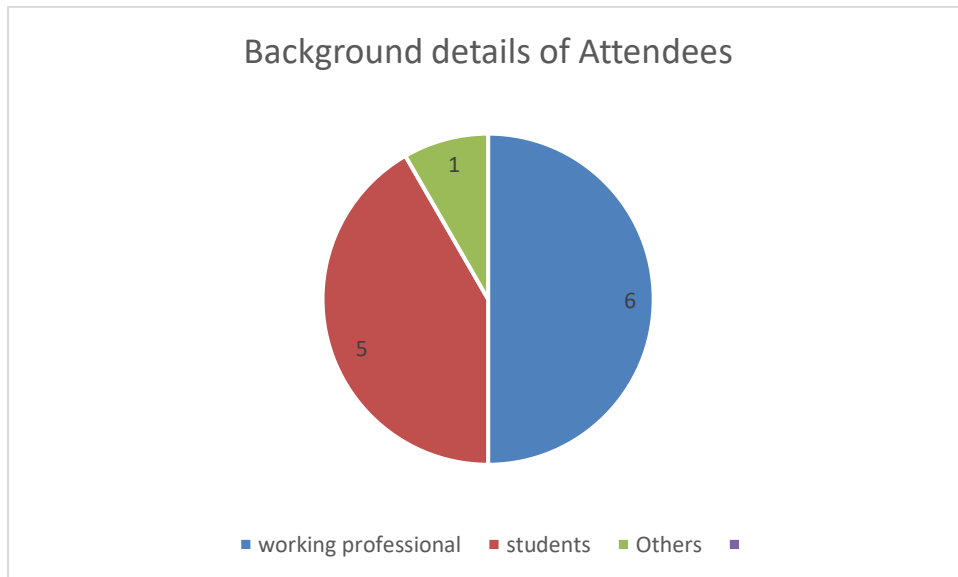

- There were 40 registrations made and 13 attendees attended the session out of which 77% were female and 23% were male.

- The maximum number of attendees were from Delhi but there were other participants also who belonged from different states.

- The majority of the attendees of the session were working professionals.

- The attendees of the session were diverse and included professionals and students from various healthcare and allied sectors.

## **WEBINAR**

The speaker of the session was Ms Ashruti Bhatt. A pre quiz session was held to make it interesting. Later on the session focussed on Literature review, Scoping reviews, its characteristics, when it is used and what are its limitations. The Scoping study methodology framework was also discussed during the session. After that the speaker focussed on Mapping review, Systematic review, steps in conducting a systematic review, its characteristics and limitations. Briefly what is Umbrella review and Mixed method review was also discussed. The session concluded with a FAQ and Match the following. The event had interactive participation by the participants.

## **FEEDBACK**

- Informative
- Helpful

## **SUGGESTIONS**

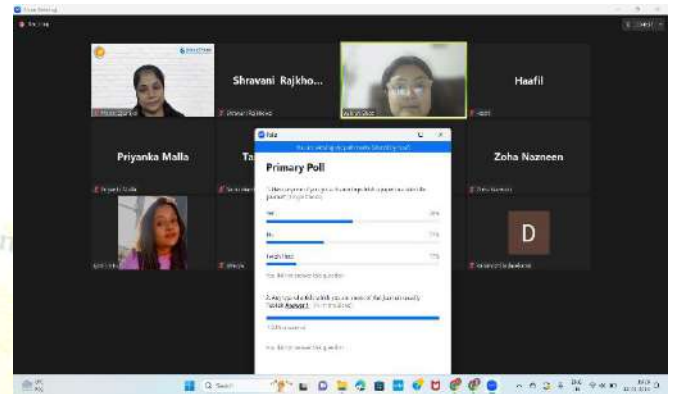

- How does the use of AI impact research writing practices

- Public Health and Sustainability
- Systematic review and software for qualitative analysis
