SWASTHYA PAHAL REPORT

2024

Date: 12/03/2024

Place: Deen Dayal Upadhyaya Camp, New Delhi. | Time: 11:00 am to 02:00 pm

Number of total beneficiaries: 17

Number of total female beneficiaries: 10

SWASTHYA PAHAL (Health for all)

Swasthya Pahal (Health for all) is an interactive, innovative, technology-enabled, SMAART (Sustainable, Multi-Sectoral, Accessible, Affordable, Reimbursable and Tailored) initiative. It utilizes a touch screen, computer-enabled, SMAART Portable Health Information Kiosk (PHIK) to enhance self-management of non-communicable diseases among individuals at risk of metabolic syndrome (including diabetes, hypertension, high cholesterol and obesity). SMAART PHIK is implemented through a series of health care camps held across urban, urban slums, and rural/tribal settings in India.

Objectives

- To integrate clinical and non-clinical data sources by combining principles of Information and Communication Technology (ICTs) to enhance population health outcomes across diverse geographic settings.
- To utilize the PHIK as a tool to assess the burden of chronic diseases and associated risk factors in diverse settings such as urban, urban slums, and rural/tribal settings in India.

Details

Date: 12th February 2024

Venue: Deen Dayal Upadhya Camp, New Delhi

Start time: 11:00 AM

End time: 02:00 PM

Number of beneficiaries: 17

Team Members: Ashok Kumar, Sakshi, Sushmi Wilson, Dr Mansi Gauniyal, Dr Sabhya Juneja, and Janhvi Sahai.

Table1: Implementation of Swasthya Pahal

Components of the camp	Details	Material and methods used
Registration	<ul style="list-style-type: none"> Collection of information from the participants such as name, age, phone number and address. 	Receipt booklet
Measurement of height and weight	<ul style="list-style-type: none"> Height and weight were measured using standard procedures and protocols. 	Digital weighing machine, stadiometer
Measurement of blood pressure and sugar	<ul style="list-style-type: none"> Blood pressure and blood sugar were measured using standard procedures and protocols. 	Digital machines for measuring blood pressure and blood sugar, lancet, strips, cotton swabs, spirit
Portable Health Information Kiosk (PHIK)	<ul style="list-style-type: none"> Collection of data from the participants pertaining to their socio-demographic profile, medical history, physical activity and alcohol and smoking consumption pattern. Assessment of risk factors based on the information collected. 	Laptop (touchscreen)
Nutrition counselling	<ul style="list-style-type: none"> Based on the assessment report generated by PHIK, participants were provided individualized diet and nutrition counselling to prevent and manage non-communicable diseases including hypertension, diabetes and overweight and obesity. They were counselled about healthy dietary habits, healthy snacking options, good dietary behaviours, meal patterns and importance of physical activity. 	Personalised nutrition and lifestyle counselling
Photographs	<ul style="list-style-type: none"> Clicking pictures of the event. 	Camera

Table 2: Health status of beneficiaries screened (n=17)

Health conditions screened	Number of participants with the condition(n)
Prehypertension/ Hypertension (blood pressure $\geq 120/80$ mmHg)	13
High Random Blood Sugar(≥ 140 mg/dL)	6
Overweight/obese (Body Mass Index ≥ 25 kg/m ²)	7
Regular physical activity (>4 times/week)	11

Observations

A total of 17 beneficiaries (7 males and 10 females) attended the Swasthya Pahal camp organised on 12th March 2024 at Deen Dayal Upadhy Camp, New Delhi. Out of seventeen beneficiaries, more than two-third (n=13) had higher blood pressure than normal. More than one-fourth of them had high blood sugar than normal (n=6) and were found to be overweight/obese (n= 7) than normal. Exactly two-third of them were found to be engaged in regular physical activity (n=11).

Additional Comments

- Beneficiaries found the counselling session very informative and useful, and many of them learned more about their health condition.
- All the beneficiaries found the Swasthya Pahal initiative to be very helpful.

Number of beneficiaries enrolled in SHINE: SMAART Hub for Informatics enabled Nutrition Education (SHINE) Initiative aims to enhance self-management of chronic non-communicable diseases using multilingual digital HEALTH intervention tailored to enhance their knowledge regarding self-management of disease condition(s), diet, physical activity, healthy lifestyle, home-remedies, medication adherence and stress management. Among seventeen beneficiaries, two-third (n=11) of them expressed their interest to receive informative messages for diet and lifestyle management and majority of them opted to receive messages on a weekly basis (n= 8) and only three opted for daily basis.
